# High quality plastic Lids (SAN) onto our porcelain ware

We have integrated high quality plastic Lids onto our porcelain ware to ensure that food safety, quality and the right temperature is maintained while serving portion sized meals. The plastic lids are high quality, food-grade and reusable in nature. They are made of SAN (Styrene acrylonitrile resin), which has an excellent load-bearing capacity with high flexural strength and can even resist thermal expansions. The combination of transparency and resistance to oil, fats and cleaning agents makes SAN very suitable for use in areas of interest. It proves to have an additional application in multi-trip tableware service in the catering sector.
